ANNOUNCEMENT

We are very pleased to announce that Paul Imm, P. Eng. has accepted the position of Technical Resources Engineer with the Ontario Concrete Pipe Association. Paul will join OCPA on January 12th, 2009.

Paul brings a wealth of experience to OCPA. He has spent the last eleven years working with Con Cast Pipe. While at Con Cast Pipe he has held the positions of Design Engineer and Project Manager, Engineering Manager, and Quality Assurance Manager. Prior to joining Con Cast Pipe Paul worked with consulting engineers in southern Ontario. He is a registered Professional Engineer in the province of Ontario and has a Bachelor of Applied Science in Civil Engineering degree from the University of Waterloo. Paul has been very active with the Technical Committee of OCPA. He is an Associate Member of the Canadian Standards Association Technical Committee for CSA A257 Series on Concrete Pipe and Manhole Sections.

The positions of Technical Resources Engineers were created at OCPA to favourably position reinforced concrete pipe and precast products in specifications and standards across Ontario. This is accomplished through ongoing interaction with consulting engineers, municipalities, government departments and agencies that maintain and develop standards such as Ontario Provincial Standards. OCPA Technical Resources Engineers regularly conduct seminars and Lunch and Learn presentations to engineers and inspectors throughout Ontario. Technical Resources Engineers are also charged with the responsibility of educating civil engineering students at universities and colleges in Ontario on the design, proper installation and testing of concrete pipe and precast products.

We are sincerely grateful to the Senior Management at Con Cast Pipe which has have been very supportive of Paul moving over to OCPA and of the OCPA Technical Resources Engineer program in general.

Please join me in congratulating Paul on his new position and wishing him well at Ontario Concrete Pipe Association.

Gerry Mulhern.
Executive Director
Ontario Concrete Pipe Association
